## Technical Skills (Developed during undergraduate studies)

### Programming and Development

- HTML, CSS, Javascript, Java, R, Python, C, C++, and C#;
- Object-Oriented Programming Logic.

### Databases

- SQL, MongoDB.

### Infrastructure and Systems

- Cloud Computing;
- Software Engineering;
- Computer Architecture.

## Additional Training

### INMEC – National Institute of Education and Culture

- Graphic and Multimedia Design:
- Photoshop CS6, Illustrator CS6, InDesign CS6
- Flash CS6, Fireworks CS6, CorelDRAW X6
- After Effects CS6, Adobe Animate, Premiere Pro
- Video editing, animation and graphic design

### Software Development:

- Android App Creation
- Games with 3D Studio
- Object-Oriented Programming Logic

### General Computing:

- Windows, Internet, Word, Excel (advanced), PowerPoint, Typing

### Udemy

- Computer Maintenance and Support
- Mobile Device Maintenance and Repair

## Languages

- Portuguese – Native
- English – Advanced
- Spanish – Basic

## About me...

- Computer Science student seeking opportunities as a freelancer, intern, or apprentice in the areas of IT, graphic design, or commerce.
- I am dedicated, proactive, and interested in continuous learning.

## Academic Background

### Catholic University of Brasília

**Course:** Computer Science

**Semester:** Seventh (7th)

**Start:** March 2023 – **Expected completion:** November 2026

## Experiences and Projects

### Freelance Graphic Designer – Logo Design (2025)

**Client:** Patrícia Lima (instagram.com/patricialimalll)

**Activities:** Creation of a logo for use on social media and in the clinic.

**Tool used:** Ibis Paint

### Volunteer Work – Casa do Menino Jesus (Youth Group)

**Period:** July 2017, 2018 and 2019 (annual activity during the holidays)

**Activities:** Support in games and educational activities with children, promoting human values and spirituality.

### Academic Projects and Contributions on GitHub

- **Interactive Programming Learning Platform (Web) (Personal Project)**

**Technologies:** HTML, CSS, JavaScript | Database: SQL

**Contribution:** Full Stack Developer

Interactive web platform for teaching programming, with an ASCII visual style.

Implementation of the system logic, interactions, and project organization.

**Link:** <https://github.com/Laila-dAM/BITROT/tree/main/Project%201>

- **CyberPulse — Threat Monitoring Platform (Personal Project)**

**Technologies:** Python, FastAPI, JavaScript, HTML/CSS, SQL, ML, Docker

**Contribution:** Full Stack Developer

Complete system development, including API, security, and predictive models.

**Link:** <https://github.com/Laila-dAM/CyberPulse>

- **MOVBR — Web-based Public Transportation System of the Federal District (DF)**

**Technologies:** HTML, CSS, JavaScript, Flask, MongoDB

**Contribution:** Front-end and Design

Creation of the system's interface and visual identity.

**Link:** <https://github.com/GustavoLarre/MOVBR>

- **VidaU — Well-being and Mental Health Platform**

**Technologies:** React.js, HTML, CSS

**Contribution:** Front-end and Design

Development of the interface and visual design.
